#### Q1 and Full Year 2024 Outlook

The Company is providing financial guidance for the first quarter of 2024 and full year 2024 as set forth in the table below. Guidance is based on current plans and expectations and is subject to a number of known and unknown uncertainties and risks, including those set forth below under “Forward-Looking Statements.”

	First Quarter 2024	Full Year 2024
Siding Net sales year-over-year growth	3% to 5%	8% to 10%
Siding Adjusted EBITDA <sup>(2)</sup>	\$65 million to \$70 million	\$280 million to \$300 million
OSB Adjusted EBITDA <sup>(2)(3)</sup>	\$65 million to \$75 million	\$215 million to \$225 million
Consolidated Adjusted EBITDA <sup>(2)(3)(4)</sup>	\$130 million to \$145 million	\$495 million to \$525 million
Capital Expenditures <sup>(5)</sup>		\$200 million to \$220 million

- (2) This is a non-GAAP financial measure. Reconciliation of Siding Adjusted EBITDA, OSB Adjusted EBITDA, and consolidated Adjusted EBITDA guidance to the closest corresponding GAAP measure on a forward-looking basis is not available without unreasonable efforts. Our inability to reconcile these measures results from the inherent difficulty in forecasting generally and quantifying certain projected amounts that are necessary for such reconciliation. In particular, sufficient information is not available to calculate certain adjustments required for such reconciliation, such as business exit charges, product-line discontinuance charges, other operating credits and charges, net, loss on early debt extinguishment, investment income, and other non-operating items, that would be required to be included in the comparable forecasted U.S. GAAP measures. The Company expects that these adjustments may potentially have a significant impact on future GAAP financial results.
- (3) For purposes of calculating the full year 2024 OSB Adjusted EBITDA and full year 2024 consolidated Adjusted EBITDA amounts in the table above, the second quarter through the fourth quarter of 2024 Adjusted EBITDA is assumed to be at our cycle average run rate of \$200 million per year.
- (4) For purposes of calculating the fourth quarter of 2024 and full year 2024 consolidated Adjusted EBITDA, LP South America Adjusted EBITDA fully offsets Corporate and Other Adjusted EBITDA.
- (5) Capital expenditures related to strategic growth and sustaining maintenance projects are expected to be between \$50 million to \$60 million and \$150 million to \$160 million, respectively.

#### Fourth Quarter 2023 Highlights

Net sales for the fourth quarter of 2023 decreased year-over-year by \$47 million (or 7%) to \$658 million. Siding revenue decreased \$54 million (or 14%), due to 15% lower volumes partially offset by 1% higher prices. OSB net sales increased \$16 million (or 6%), driven by 9% higher prices partially offset by 3% lower volumes. The LP South America (LPSA) segment revenues increased year-over-year by \$1 million and Other revenues decreased year-over-year by \$10 million.

Net income increased year-over-year by \$69 million to \$59 million (\$0.81 per diluted share) primarily due to an increase in Adjusted EBITDA of \$29 million (or 29%) and the non-recurrence of a non-cash, pre-tax pension settlement charge of \$78 million in the fourth quarter of 2022, partially offset by an \$18 million increase in the provision for income taxes. The year-over-year increase in Adjusted EBITDA includes \$17 million due to higher OSB selling prices and a \$13 million decrease in inflationary costs (including freight, raw materials, and labor).

#### Full Year 2023 Highlights

Net sales for 2023 decreased year-over-year by \$1,273 million (or 33%) to \$2,581 million. OSB revenue decreased \$1,036 million due to 40% lower prices and 18% lower volumes. Siding revenue decreased \$141 million (or 10%), due to 14% lower volumes, partially offset by 5% higher prices. The LPSA segment and Other revenues decreased year-over-year by \$36 million and \$61 million, respectively.

Net income decreased year-over-year by \$905 million (or 84%) to \$178 million (\$2.46 per diluted share) primarily due to a decrease in Adjusted EBITDA of \$911 million (or 66%) and a decrease in income from discontinued operations, net of income taxes of \$198 million, partially offset by a \$200 million decrease in the provision for income taxes. The decrease in Adjusted EBITDA includes \$793 million due to lower OSB selling prices, a decrease in OSB sales volumes of \$87 million, and a reduction in Siding sales volumes of \$95 million, partially offset by an increase in Siding average selling prices of \$52 million.

The effects of list price increase drove year-over-year increases in the average net selling price for the fourth quarter and full year 2023. The volume decreases for the fourth quarter and full year 2023 were driven by record results in the comparable period and challenging new and existing home sales markets in the current period.

Full year 2023 Adjusted EBITDA decreased year-over-year by \$70 million, which reflects the net impact of lower volumes, a \$10 million decrease in Siding mill capacity investments, a \$10 million increase in operational support costs, and a \$5 million press rebuild, partially offset by higher average selling prices.

OSB - Commodity		12%	(25)%	(39)%		(22)%

Fourth quarter 2023 net sales increased year-over-year \$16 million (or 6%), reflecting a \$17 million increase in revenue due to higher OSB selling prices. Full year 2023 net sales decreased year-over-year by \$1,036 million (or 50%) including a \$793 million decrease in revenue due to lower average selling prices and a \$217 million decrease in sales volumes, including \$112 million of lower production volume from the conversion of the Sagola mill to siding production.

Adjusted EBITDA for fourth quarter of 2023 increased year-over-year by \$46 million primarily due to higher commodity selling prices, a \$7 million decrease in inflationary costs including freight, raw materials, and labor, and a \$7 million decrease in mill-related costs. ## Use of Non-GAAP Information

In evaluating our business, we utilize non-GAAP financial measures that fall within the meaning of SEC Regulation G and Regulation S-K Item 10(e), which we believe provide users of the financial information with additional meaningful comparison to prior reported results. Non-GAAP financial measures do not have standardized definitions and are not defined by U.S. generally accepted accounting principles (U.S. GAAP). In this press release, we disclose income attributed to LP from continuing operations before interest expense, provision for income taxes, depreciation and amortization, and excluding stock-based compensation expense, loss on impairment attributed to LP, product-line discontinuance charges, business exit charges, other operating credits and charges, net, loss on early debt extinguishment, investment income, pension settlement charges, and other non-operating items, as Adjusted EBITDA from continuing operations (Adjusted EBITDA), which is a non-GAAP financial measure. We have included Adjusted EBITDA in this report because we view it as an important supplemental measure of our performance and believe that it is frequently used by interested persons in the evaluation of companies that have different financing and capital structures and/or tax rates. We also disclose income attributed to LP from continuing operations, excluding loss on impairment attributed to LP, business exit charges, product-line discontinuance charges, interest expense outside of normal operations, other operating credits and charges, net, loss on early debt extinguishment, gain (loss) on acquisition, and pension settlement charges, and adjusting for a normalized tax rate as Adjusted Income from continuing operations (Adjusted Income). We also

disclose Adjusted Diluted EPS from continuing operations (Adjusted Diluted EPS), calculated as Adjusted Income divided by diluted shares outstanding. We believe that Adjusted Diluted EPS and Adjusted Income are useful measures for evaluating our ability to generate earnings and that providing these measures should allow interested persons to more readily compare the earnings for past and future periods. Reconciliations of Adjusted EBITDA, Adjusted Income and Adjusted Diluted EPS to their most directly comparable U.S. GAAP financial measure, are presented below.

Adjusted EBITDA, Adjusted Income, and Adjusted Diluted EPS are not substitutes for the U.S. GAAP measures of Net income, Income attributed to LP from continuing operations, and Income attributed to LP from continuing operations per diluted share, or for any other U.S. GAAP measures of operating performance. It should be noted that other companies may present similarly titled measures differently, and therefore, as presented by us, these measures may not be comparable to similarly titled measures reported by other companies. Adjusted EBITDA, Adjusted Income, and Adjusted Diluted EPS have material limitations as performance measures because they exclude items that are actually incurred or experienced in connection with the operation of our business.

During the year ended December 31, 2023, we updated our definitions of Adjusted EBITDA, Adjusted Income, and Adjusted Diluted EPS to exclude other business exit charges not classified as discontinued operations. Business exit charges consist of inventory and other asset impairment and exit charges related to the exit of other businesses not individually significant. We consider business exit charges to be outside the performance of our ongoing core business operations and believe that presenting Adjusted EBITDA, Adjusted Income, and Adjusted Diluted EPS excluding business exit charges provides increased transparency as to the operating costs of our current business performance. We did not revise prior years' Adjusted EBITDA, Adjusted Income, and Adjusted Diluted EPS amounts because there were no significant costs similar in nature to these items.

KEY PERFORMANCE INDICATORS

The following tables present summary data relating to: (i) housing starts within the United States, (ii) our sales volumes, and (iii) our Overall Equipment Effectiveness (OEE) performance. We consider the following items to be key performance indicators for our business because LP's management uses these metrics to evaluate our business and trends in our industry, measure our performance, and make strategic decisions. We believe that the key performance indicators presented may provide additional perspective and insights when analyzing our core operating performance. These key performance indicators should not be considered superior to, as a substitute for, or as an alternative to, and should be considered in conjunction with the financial measures that were prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). These measures may not be comparable to similarly titled performance indicators used by other companies.

We monitor housing starts, which is a leading external indicator of residential construction in the United States that correlates with the demand for many of our products. We believe that this is a useful measure for evaluating our results and that providing this measure should allow interested persons to more readily compare our sales volume for past and future periods to an external indicator of product demand. Other companies may present housing start data differently, and therefore, as presented by us, our housing start data may not be comparable to similarly titled indicators reported by other companies.

The following table sets forth housing starts for the quarter and year ended December 31, 2023 and 2022:

	Quarter Ended December 31,		Year Ended December 31,	
	2023	2022	2023	2022

Multi-Family	98	134	469	547
	<b>334</b>	<b>327</b>	<b>1,413</b>	<b>1,553</b>

<sup>1</sup>Actual U.S. housing starts data, in thousands, reported by U.S. Census Bureau as published through January 18, 2024.

We monitor sales volumes for our products in our Siding, OSB, and LPSA segments, which we define as the number of units of our products sold within the applicable period. Evaluating sales volume by product type helps us identify and address changes in product demand, broad market factors that may affect our performance, and opportunities for future growth. It should be noted that other companies may present sales volume data differently, and therefore, as presented by us, sales volume data may not be comparable to similarly titled measures reported by other companies. We believe that sales volumes can be a useful measure for evaluating and understanding our business.

The following table sets forth sales volumes for the quarter and year ended December 31, 2023 and 2022:

We measure OEE of each of our mills to track improvements in the utilization and productivity of our manufacturing assets. OEE is a composite metric that considers asset uptime (adjusted for capital project downtime and similar events), production rates, and finished product quality. We believe that when used in conjunction with other metrics, OEE can be a useful measure for evaluating our ability to generate profits, and that providing this measure should allow interested persons to monitor operational improvements. We use a best-in-class target across all LP sites that allows us to optimize capital investments, focus maintenance and reliability improvements, and improve overall equipment efficiency. It should be noted that other companies may present OEE data differently, and therefore, as presented by us, OEE data may not be comparable to similarly titled measures

reported by other companies.
