- (1) This is a non-GAAP financial measure. Reconciliation of Siding Adjusted EBITDA, OSB Adjusted EBITDA, and consolidated Adjusted EBITDA guidance to the closest corresponding GAAP measure on a forward-looking basis is not available without unreasonable efforts. Our inability to reconcile these measures results from the inherent difficulty in forecasting generally and quantifying certain projected amounts that are necessary for such reconciliation. In particular, sufficient information is not available to calculate certain adjustments required for such reconciliation, such as business exit credits and charges, product-line discontinuance charges, other operating credits and charges and credits, net, loss on early debt extinguishment, investment income, and other non-operating items, that would be required to be included in the comparable forecasted U.S. GAAP measures. The Company expects that these adjustments may potentially have a significant impact on future GAAP financial results.
- (2) We determine the cycle average for OSB Adjusted EBITDA by dividing the sum of the full year 2014 through 2020 and 2023-2024 OSB Adjusted EBITDA by total OSB sales volume over the same periods to determine the average Adjusted EBITDA per thousand square feet on a 3/8 basis ("Average Adjusted EBITDA/MSF"). The Average Adjusted EBITDA/MSF is multiplied by the total OSB production capacity multiplied by 85%, the average capacity utilization over the same period.
- (3) For purposes of calculating the full year 2025 OSB Adjusted EBITDA and full year 2025 consolidated Adjusted EBITDA amounts in the table above, the second quarter through the fourth quarter of 2025 Adjusted EBITDA is assumed to be at our cycle average run rate.
- (4) For purposes of calculating the first quarter of 2025 and full year 2025 consolidated Adjusted EBITDA, LP has assumed that LP South America Adjusted EBITDA would fully offset Other Adjusted EBITDA.
- (5) This is a non-GAAP financial measure and is calculated as Adjusted EBITDA¹ divided by net sales.
